1/5/24, 10:38 PM Solution

## Springbos Solution

In this exercise, you'll analyze expressions and code to figure out the time complexity.

## **Step One: Simplifying Expressions**

Simplify the following big O expressions as much as possible:

- 1.  $O(n + 10) \rightarrow O(n)$
- 2. O(100 \* n) -> O(n)
- 3.  $O(25) \rightarrow O(1)$
- 4.  $O(n^2 + n^3) -> O(n^3)$
- 5. O(n + n + n + n) -> O(n)
- 6. O(1000 \* log(n) + n) -> O(n)
- 7. O(1000 \* n \* log(n) + n) -> O(n log n)
- 8.  $O(2^n + n^2) -> O(2^n)$
- 9.  $O(5 + 3 + 1) \rightarrow O(1)$
- 10.  $O(n + n^{(1/2)} + n^2 + n * log(n)^{10} -> O(n^2)$

## **Step Two: Calculating Time Complexity**

Determine the time complexities for each of the following functions. If you're not sure what these functions do, copy and paste them into the console and experiment with different inputs!

```
function logUpTo(n) { for (let i = 1; i <= n; i++) { console.log(i); } }</pre>
```

Time Complexity: O(n)

```
function logAtLeast10(n) { for (let i = 1; i \le Math.max(n, 10); i++) { console.log(i); }
```

1/5/24, 10:38 PM Solution

Time Complexity: O(n)

```
function logAtMost10(n) { for (let i = 1; i \leftarrow Math.min(n, 10); i++) { console.log(i); }
```

Time Complexity: O(1)

```
function onlyElementsAtEvenIndex(array) { let newArray = []; for (let i = 0;
i < array.length; i++) { if (i % 2 === 0) { newArray.push(array[i]); } ret
urn newArray; }</pre>
```

Time Complexity: O(n)

Time Complexity: O(n^2)

```
function vowelCount(str) { let vowelCount = {}; const vowels = "aeiouAEIOU";
for (let char of str) { if(vowels.includes(char)) { if(char in vowelCount) {
  vowelCount[char] += 1; } else { vowelCount[char] = 1; } } return vowelCount; }
```

Time Complexity: O(n) // includes is on a fixed length string // the max number of keys is 10

1/5/24, 10:38 PM Solution

## Part 3 - short answer

Answer the following questions

- 1. True or false:  $n^2 + n$  is  $O(n^2)$ . True
- 2. True or false:  $n^2 * n$  is  $O(n^3)$ . True
- 3. True or false:  $n^2 + n$  is O(n). False
- 4. What's the time complexity of the indexOf array method? O(n)
- 5. What's the time complexity of the <u>.includes</u> array method? O(n)
- 6. What's the time complexity of the <u>.forEach</u> array method? O(n) at least (depends on what the callback does)
- 7. What's the time complexity of the sort array method? O(n log n)
- 8. What's the time complexity of the .unshift array method? O(n)
- 9. What's the time complexity of the push array method? O(1)
- 10. What's the time complexity of the splice array method? O(n) it can be O(1) if the end, but we can't assume that
- 11. What's the time complexity of the pop array method? O(1)
- 12. What's the time complexity of the Object.keys() function? O(n)
- 13. What's the space complexity of the Object.keys() function? O(n)
